  - To predict the skin cancer with of the images using Deep learning techniques to achieve the higher accuracy.
  - Providing the desired solutions to the particular problem.
  - Skills we used: Machine Learning, Python, Pandas, Numpy, Matplotlib and Scikit-learn (sklearn).
- **Used car price prediction** *april 2024*
  Tools: Machine Learning [ ]
  - the primary objective of this project is to develop a machine learning-based system for accurately predicting used car prices.
  - Several machine learning algorithms, including linear regression, decision trees, random forests, and gradient boosting, are implemented and compared for their performance in predicting used car prices.
  - The models are trained and evaluated using techniques such as cross-validation and mean absolute error to ensure robustness and accuracy.
